**Notes to financial statements**  
**For the six months ended 30 September 2021**

**1. SUMMARY OF ACCOUNTING POLICIES:**

**1.1. Statement of Compliance:**

Bank of India (New Zealand) Limited (the "Bank") is a profit-oriented entity incorporated under the Companies Act 1993 and domiciled in New Zealand. Its principal activity is the provision of banking services. Bank of India (New Zealand) Limited was incorporated on 9 October 2008. It became a registered bank on 31 March 2011.

The Bank is an FMC reporting entity for the purposes of the Financial Markets Conduct Act 2013 (FMCA 2013). Its financial statements comply with the requirements of the Financial Market Conduct Act 2013 (FMCA 2013) and the requirements of Registered Bank Disclosure Statement (New Zealand Incorporated Registered Banks) Order 2014 (as amended).

These interim financial statements have been prepared and presented in accordance with the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014 (as amended).

These interim financial statements have also been prepared in accordance with Generally Accepted Accounting Practice in New Zealand as appropriate for the interim financial statements for Tier 1 for profit-oriented entities, and in accordance with the New Zealand equivalent to International Accounting Standard 34 *Interim Financial Reporting* ("NZ IAS 34"), and International Accounting Standard 34 *Interim Financial Reporting* ("IAS 34").

These interim financial statements do not include all the information and disclosures required in annual financial statements and should be read in conjunction with the Disclosure Statement for the year ended 31 March 2021.

These interim financial statements comply with both NZ IAS 34 and IAS 34.

The interim financial statements were authorised for issue by the directors on 25 November 2021.

**1.2. Basis of preparation:**

The interim financial statements have been prepared on a going concern basis in accordance with historical cost concepts.

In April 2021 the Parent reversed their initial decision to close the Bank after taking into account the current market conditions and the satisfactory performance of the Bank.

As a result of the reversal of the initial decision to close the Bank, no material uncertainty exists in relation to the Bank's ability to continue as a going concern.

The functional and presentation currency is New Zealand Dollars (NZD). The amounts in the Disclosure Statement have been rounded to the nearest thousand dollars, except where otherwise stated.

The same accounting policies and methods of computation have been followed in preparing these interim financial statements as were used in preparing the financial statements for the year ended 31 March 2021.

**1.3. Comparatives:**

When the presentation or classification of items is changed, comparative amounts are reclassified unless the reclassification is impracticable.

**1.4. Accounting judgments and major sources of estimation uncertainty:**

In the application of the Bank's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The Bank takes into consideration historical data, the quality of the securities held as collateral and current market conditions in determining ECL. With respect to the impact of Covid 19, taking into account the recent ongoing lockdown, the Bank remains of a view that there remains residual market uncertainty which could adversely impact the wider economy and the Bank's borrowers. In estimating the expected credit loss provision, the Bank has taken into account the possible impact of the uncertainty, and has made adjustments to the ECL model to reflect the uncertainty. The adjustments were made specifically for those customers who have historically obtained loan deferrals by transitioning them to stage-2 exposures. (Refer to note 16 for further details on ECL calculation).

The risk that funds in foreign currencies cannot be transferred out of a country. The risk relates to specific explicit government restrictions or simply depleted foreign exchange funds in the non-industrial countries of Africa, Asia, Latin America and Central and Eastern Europe.

**Strategic / Business Risks:**

Current and prospective impact on earnings or capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes.

**Tax Risk:**

Risk arising from adverse changes in relevant taxation laws, failure to correctly identify implications of existing taxation laws or breaches of tax laws.

**Legal Risk:**

Risk arising from legal proceedings or failure to legally enforce a contractual arrangement relating to the Bank's activities.

The Bank has reviewed these other risks and do not believe any individual risk as being material and requiring a capital allocation (31 March 2021: Nil; 30 September 2020: Nil). The Bank will review this allocation methodology every reporting period in line with industry practice as this area evolves over time.

The Bank measures the primary risks and its overall minimum Capital Adequacy Ratio in accordance with the Reserve Bank document entitled "Capital Adequacy Framework" (Standardised Approach) (BS2A). The Bank's approach to assess capital adequacy recognises the importance of using quantitative techniques and qualitative assessment /management judgement in arriving at a final measure of risk. As part of its on-going capital planning and budgeting processes management also develops a range of scenarios as a basis for identifying plausible severe loss events and changes in market conditions and measures / quantifies the potential financial impacts (direct and indirect) on the Bank's capital adequacy for the foreseeable future (2-3 years).

**Notes to financial statements**  
**For the six months ended 30 September 2021**

**Legal Risk (continued...)**

Senior management of the Bank is responsible for the capital planning and budgeting process and is required to perform ongoing calculation of Capital Adequacy Ratio and report this to the Board of Directors on a regular basis. The Board of Directors of the Bank is responsible to monitor the Capital Adequacy Ratio on a regular basis.

**Capital ratios of the ultimate parent bank:**

	<b>As at 30.09.2021 (Unaudited)</b>	<b>As at 31.03.2021 (Audited)</b>	<b>As at 30.09.2020 (Unaudited)</b>
CET 1 capital ratio	13.43%	11.51%	9.67%
Tier one capital ratio	13.88%	11.96%	9.67%
Total capital ratio	17.05%	14.93%	12.80%

The ultimate parent bank is Bank of India, domiciled in India. Figures are taken from Bank of India's Financial Results for the period ended 30 September 2021; 31 March 2021 and 30 September 2020 from its website. The above ratios are derived in accordance with the Capital Adequacy Framework (Basel III) as per Reserve Bank of India (RBI) guidelines effective 30 September 2013.

Bank of India is required by the RBI to hold minimum capital at least equal to that specified under the Basel III (standardised) approach. At balance dates (i.e., 30 September 2021; 31 March 2021 and 30 September 2020), Bank of India was in compliance with the requirements imposed.

Bank of India has published pillar three disclosure information on the implementation of the Basel III capital adequacy framework on its website and can be found at <http://www.bankofindia.co.in>

**Regulatory liquidity ratios:**

The table below shows the arithmetic 3-month average of the respective daily ratio values in accordance with RBNZ's Liquidity Policy (BS13/BS13A) ("BS13") and the Bank's Conditions of Registration relating to liquidity-risk management.

The one-week mismatch ratio is a measure of the Bank's one-week mismatch amount over its total funding, where the one-week mismatch amount represents the Bank's portfolio of primary liquid assets plus expected cash inflows minus expected cash outflows during a one-week period of stress. The bank is required to maintain this ratio above a minimum level of zero percent on a daily basis. The one-week mismatch ratio =  $100 \times (\text{one-week mismatch dollar amount} / \text{total funding})$ .

The one-month mismatch ratio is a measure of the Bank's one-month mismatch amount over its total funding, where the one-month mismatch amount represents the Bank's stock of primary and secondary liquid assets plus expected cash inflows minus expected cash outflows during a one-month period of stress. The bank must maintain this ratio above a minimum level of zero percent on a daily basis. The one-month mismatch ratio =  $100 \times (\text{one-month mismatch dollar amount} / \text{total funding})$ .

The one-year core funding ratio measures the extent to which loans and advances are funded by funding that is considered stable. The one-year core funding ratio =  $100 \times (\text{one-year core funding dollar amount} / \text{BS13 total loans and advances})$  and must currently remain above 50 percent on a daily basis.

<b>Average for the three months ended</b>	<b>30.09.2021 (%)</b>	<b>31.03.2021 (%)</b>	<b>30.09.2020 (%)</b>
Quarterly average one-week mismatch ratio	29.09	25.80	33.32
Quarterly average one-month mismatch ratio	29.10	23.40	42.39
Quarterly average core funding ratio	84.86	107.30	110.24

**Outcome of the RBNZ liquidity thematic review:**

The RBNZ published a report in September 2021 outlining the findings from the thematic review of compliance with the RBNZ's liquidity policy (BS13). The Bank also received an individual feedback letter highlighting areas of improvement in relation to documentation of internal buffer limits and the Bank's Contingency Fund Plan.

The Bank is required to perform a self-assessment against the findings in the report and the matters highlighted in the individual feedback letter to support its compliance with the requirements of BS13. The Bank is in the process of performing the self-assessment and continues to engage with the RBNZ in respect of this matter.

**16. ASSET QUALITY:**

The bank uses a “days past due” model for ECL calculation.

Loss allowance for ECL includes consideration of:

Probability of default (“PD”) which estimates the probability that a customer will default over the next 12 months;

Exposure at time of default (EAD) which estimates the amount of outstanding principal, undrawn loan commitments and contingent exposures (such as guarantees issued by the Bank) at the time of default; and Loss given default (LGD) which estimates the expected loss in the event of default, it is the percentage of exposure which will be lost after all recovery efforts, including legal expenses and recovery expenses.

The above inputs have been applied in the calculation of loss allowances for ECL on loan exposures classified within the following stages.

Stage 1- 12 month ECL-“performing”: It includes financial Assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. Under stage 1, the bank includes all financial assets with days past due of less than 30 days (0-29 days).

Stage 2- Lifetime ECL-“underperforming”: It includes financial instruments that have had a significant increase in credit risk since initial recognition (unless they have low credit risk at the reporting date) but that do not have objective evidence of impairment. Under stage 2, the bank includes all financial assets with days past due between 30-89 days.

Stage 3- Lifetime ECL-“non performing”: It includes financial assets that have objective evidence of impairment at the reporting date. Under stage 3, the bank includes all financial assets with days past due of 90 days and above. It also includes assets identified as substandard, doubtful, loss and restructured.

Loss allowances for ECL are presented in the statement of financial position as a deduction from the gross carrying amounts of loans and advances.

Impaired assets consist of assets acquired through the enforcement of security and other impaired assets.

The Bank has past due but not impaired assets of \$16,450,000 as at 30 September 2021. (31 March 2021: \$8,348,000; and 30 September 2020: \$ 15,415,000).

The Bank has NIL impaired assets as at 30 September 2021. (31 March 2021: Nil; and 30 September 2020: Nil).

**Significant increase in credit risk:**

While considering a transfer from stage-1 to stage-2, a significant increase in credit risk for financial assets are assessed by comparing the risk of default at reporting date to the corresponding risk of default at origination. In determining what constitutes a significant increase in credit risk, the Bank has considered reasonable and supportable quantitative and qualitative information. For the majority of portfolio, the primary indicator of significant increase in credit risk is a default in the terms and conditions of the contract resulting in a significant deterioration in the internal credit rating. The Bank also uses a range of secondary indicators such as, 30 days past due arrears etc.

All new loans approved in the current year which have not shown indicators of an increase in credit risk are classified under stage-1 unless the new loan is for a customer falling under a group which is classified under a different stage.

In the current macroeconomic environment, the Bank assessed whether there was a significant increase in credit risk for individual borrowers and at a portfolio level. As such, the Bank used its NZ IFRS 9 model in place and the ECL has been adjusted for both residential mortgage loans and business loans categories based on the downgrade of the loans to the stage-2 category for borrowers who obtained loan deferrals.

**ECL measurement and forward looking information:**

ECLs are probability weighted credit losses estimated by evaluating a range of possible outcomes and taking into account the time value of money, past events, current conditions and forecasts of future economic conditions. The Bank has developed and tested NZ IFRS9 compliant models for loan portfolios.

The majority of the customers who were granted deferment of payment due to impact of Covid19 for the year ended 31 March 2021, started repaying the instalments after the expiry of the moratorium. We do, however, consider there remains residual market uncertainty resulting from the Covid19 pandemic and its potential downstream impacts on the economy. Consequently, the Bank has continued to designate these loans as stage-2 exposures to account for any unforeseen adverse change in the macroeconomic environment.

With respect to the project loans, the Bank assumes that during the tenure of the loan, the borrower will have to service the interest only and the loan will be repaid by the bullet payment, out of the sale proceeds of the residential units, at the completion of the project. The borrower will service the interest by their other sources of income. The project loans are considered for five different projects for the construction of residential units and the promoters are considered to be experienced and versatile in their field. They do have the diversity and associated with other business activities as well to continue servicing the project loans. The Bank has classified these exposures as Stage-1 exposures, due to the lower credit risk.

The Bank assesses on a monthly basis whether objective evidence of ECL exists individually for loans and advances. If the Bank determines that no objective evidence of ECL exists for individually assessed loans and advances, loans and advances with similar credit risk characteristics are grouped and assessed collectively for ECL. The assessment for collective ECL is based on the history of impairment of the loan portfolios.

## Notes to financial statements

### For the six months ended 30 September 2021

#### Allowance for credit impairment losses (continued...)

The objective of impairment requirements under the approach is to recognise lifetime ECLs for all financial instruments for which there has been a significant increase in credit risk since origination. The assets, which have not undergone any significant deterioration, shall be recognised with only 12-month ECL. ECL is calculated based on the stage of financial instrument.

The Bank does not have any financial assets designated as fair value through profit or loss as at and for the six months ended 30 September 2021 (31 March 2021: Nil; 30 September 2020: Nil).

As such, there were no changes in fair value attributable to changes in credit risks that have been charged to the statement of comprehensive income for the six months ended 30 September 2021 (31 March 2021: Nil; 30 September 2020: Nil).

There was no aggregate amount of undrawn balances on lending commitments to counterparties for whom drawn balances are classified as individually impaired as at and for the six months ended 30 September 2021 (31 March 2021: Nil; 30 September 2020: Nil).

There were no other assets under administration as at and for the six months ended 30 September 2021 (31 March 2021: Nil; 30 September 2020: Nil).

**Fair value estimation:**

Quoted market prices, when available, are used as the measure of fair values for financial instruments. However, for some of the Bank's financial instruments, quoted market prices do not exist. For such financial instruments, fair values presented are estimates derived using present value or other market accepted valuation techniques.

These techniques involve uncertainties and are affected by the assumptions used and judgements made regarding risk characteristics of various financial instruments, discount rates, and estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates and the resulting fair values.

The fair value estimates were determined by application of the methods and assumptions described below.

**Cash:**

For cash assets, the carrying amount is equivalent to the fair value as they are highly liquid. For short term liquid assets, estimated fair values are based on quoted market prices.

**Balance due from other financial institutions:**

These are call and short-term deposits with other financial institutions which are relatively liquid and therefore carrying amount is equivalent to fair value.

**Advances to customers:**

For variable rate loans and advances, the carrying amount is a reasonable estimate of fair value. For fixed rate loans and advances, fair values have been estimated using a discounted cash flow model with reference to market interest rates, prepayment rates and rates of estimated credit losses.

**Interest receivables:**

For Interest receivables, the carrying value is considered to approximate the fair values, as they are short term in nature or are receivable on demand.

**Deposits by customers and related parties:**

For fixed term deposits by customers and related parties, fair values have been estimated using a discounted cash flow model with reference to market interest rates. For other deposits by customers and related parties, the carrying amount is a reasonable estimate of fair value.

**Interest payable:**

Interest payable is generally short-term and is expected to be settled within one year. Therefore, the carrying amount is equivalent to fair value.

**18. RISK MANAGEMENT:**

The credit policy has been set by the Board. Bank officers seek Board approval before deviating from any lending guideline or policy outside of delegations. Credit approval authorities have been delegated by the Board to senior executives of the Bank. Compliance with these policies is monitored by the Audit and Risk Committee and reported to the Board.

**Credit rating models:**

The Bank assesses risk at the time of appraisal of the loan using its rating model for various types of borrowers. A business portfolio is assessed on a risk rated basis and a retail portfolio on a scoring basis.

**Credit exposure ceilings:**

As a means of avoiding concentration of credit risk, the Bank sets ceilings in relation to single/group borrowers and unsecured borrowers.

In this condition of registration, the meaning of "material" is based on generally accepted accounting practice.

3. That the banking group's insurance business is not greater than 1% of its total consolidated assets.

For the purposes of this condition of registration, the banking group's insurance business is the sum of the following amounts for entities in the banking group:

A-/A3	30
BBB+/Baa1 and below	15

Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15% of the banking group's Tier 1 capital.

# Independent Review Report

To the Shareholder of Bank of India (New Zealand) Limited

## Report on the half year disclosure statement

### Conclusion

We have completed a review of the accompanying half year disclosure statement which comprises:

- the interim financial statements formed of:
  - the statement of financial position as at 30 September 2021;
  - the statements of comprehensive income, changes in equity and cash flows for the 6 month period then ended; and
  - notes, including a summary of significant accounting policies and other explanatory information.
- the supplementary information prescribed in Schedules 5, 7, 9, 13, 16 and 18 of the Order.

Based on our review of the interim financial statements and supplementary information of the Bank of India (New Zealand) Limited (the "Registered Bank") on pages 7 to 36, nothing has come to our attention that causes us to believe that:

- i. the interim financial statements do not present fairly in all material respects the Registered Bank's financial position as at 30 September 2021 and its financial performance and cash flows for the 6 month period ended on that date;
- ii. the interim financial statements (excluding the supplementary information disclosed in accordance with Schedules 5, 7, 9, 13, 16 and 18 of the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014 (as amended) (the "Order")), have not been prepared, in all material respects, with NZ IAS 34 *Interim Financial Reporting* ("NZ IAS 34");
- iii. the supplementary information, does not fairly state, in all material respects, the matters to which it relates in accordance with Schedules 5, 7, 13, 16 and 18 of the Order; and
- iv. the supplementary information relating to capital adequacy and regulatory liquidity requirements, has not been, in all material respects, disclosed in accordance with Schedule 9 of the Order.

### Basis for conclusion

A review of the half year disclosure statement in accordance with NZ SRE 2410 *Review of Financial Statements Performed by the Independent Auditor of the Entity* ("NZ SRE 2410") is a limited assurance engagement.

The auditor performs procedures, consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

As the auditor of Bank of India (New Zealand) Limited, NZ SRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial statements.

Our firm has also provided other services to the Registered Bank in relation to the review of interim special purpose financial statements, for the six month period ended 30 September 2021, prepared for group consolidation purposes. Subject to certain restrictions, partners and employees of our firm may also deal with the Registered Bank on normal terms within the ordinary course of trading activities of the business of the Registered Bank. These matters have not impaired our independence as reviewer of the Registered Bank. The firm has no other relationship with, or interest in, the Registered Bank.

### Emphasis of Matter

We draw attention to Note 1.4 to the interim financial statements, which describes the residual market uncertainty resulting from the potential adverse economic impact of the COVID-19 pandemic, specifically relating to the estimation of the Registered Bank's expected credit losses.

In our view, this issue is fundamental to the users' understanding of the interim financial statements and the financial position and performance of the Registered Bank. Our conclusion on the interim financial statements is not modified in respect of this matter.

### Use of this independent review report

This independent review report is made solely to the Shareholder as a body. Our review work has been undertaken so that we might state to the Shareholder those matters we are required to state to them in the independent review report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Shareholder as a body for our review work, this independent review report, or any of the opinions we have formed.

### Responsibilities of the Directors for the half year disclosure statement

The Directors, on behalf of the Registered Bank, are responsible for:

- the preparation and fair presentation of the supplementary information in regards to capital adequacy and regulatory liquidity requirements in accordance with the Registered Bank's conditions of registration, Capital Adequacy Framework (Standardised Approach) (BS2A) and Schedule 9 of the Order;
- implementing necessary internal control to enable the preparation of a half year disclosure statement that is fairly presented and free from material misstatement, whether due to fraud or error; and
- assessing the ability to continue as a going concern. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate or to cease operations, or have no realistic alternative but to do so.
